## PARAMETERS

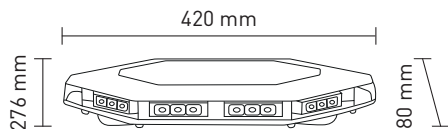

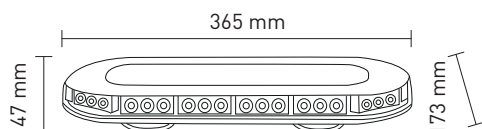

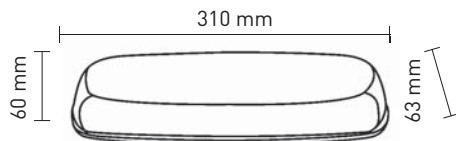

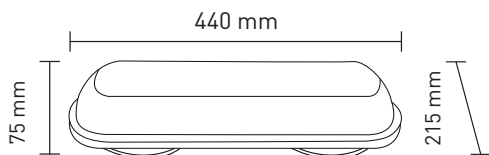

|                              |                                                                                                               |
|------------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Voltage</b>               | 9-33 VDC                                                                                                      |
| <b>LED qty</b>               | length 440 mm - 44x LED / 420 mm - 30x LED / 365 mm - 42x LED / 310 mm - 72 x LED / 580 mm - 72 x LED / * 3 W |
| <b>Flash pattern</b>         | 8x (length 440 mm, 310 mm), 26x (length 420 mm, 365 mm), 29x (length 580 mm)                                  |
| <b>IP Rating</b>             | IP65                                                                                                          |
| <b>Approval</b>              | CE, ECE R10, ECE R65                                                                                          |
| <b>Operating Temperature</b> | -30 °C to +50 °C                                                                                              |
| <b>Colour</b>                | orange/blue (according to the version)                                                                        |
| <b>Mounting</b>              | magnetic or screw (depends on type of lamp)                                                                   |

## SIZE

### SCREW MOUNTS:

### WITH MAGNET:

# CONTROLLER AND CONNECTION

ALL VERSION EXCEPT 440 MM WITH SCREWS

**440 MM WITH SCREWS:**

black wire: negative -

red wire: positive +

## **WARNING!**

- Do not look directly into LEDs while in operation; may cause momentary blindness and/or eye damage.
- It is not recommended to use magnetically mounted warning devices on vehicles in motion, if needed, it is suggested to use bolt installation.
