Identify the part number of the unit you have. In addition to identifying the part number from the part label it is also required that you identify the REV level. It is probable that no REV level is present; if so, utilize the part number only to identify the appropriate part. However, if a REV level is present, choose the applicable part for that REV level which is listed below the part number.

Rev. D

Rev. B

“Rev.” This indicates the revision letter on the label. If your unit is this revision or later, use this service component.
